Open Innovation Challenge –

Repair. The new normal.

In our **2nd challenge** we are working together with the Climathon Zurich 2022. On 28th and 29th of October, interdisciplinary teams are looking for solutions to strengthen the topic of repair. Among other things, they will be asking questions such as:

- How can we drive a culture of repairing products?
- How can we make repairing easier?
- What new business models are conceivable for repair services?
- How can existing potential be used on a broad scale?

In addition to the participants of the Climathon, **all interested parties have the opportunity to submit their idea or solution in order to receive funding of CHF 15,000 for the development of a proof of concept. Submission deadline is 6th of November 2022.**
